PHILIPS

Highlights

Light wakes you gently

Light gradually increases in 30 minutes before your set wake up time. Light falls on your eyes and positively affects your energy hormones, preparing your body to wake up. This makes waking up a more pleasant feeling.

Energy saving lamp

Wake-up Light is the only dawn simulator that makes use of an energy saving lamp. It consumes up to 24% less energy compared to a Wake-up Light with a normal light bulb.

300 Lux light intensity

The sensitivity to light differs a lot per person. In general, when using a higher light intensity a person needs less time to become fully awake. The light intensity of the Wake-up Light can be set up to 300 Lux. This makes sure you can wake up to the light intensity that suits your personal preference best.

Clinically proven

It has been clinically proven that light wakes you up more pleasantly and improves the quality of waking up.

4 natural wake-up sounds

At your set wake-up time, you will start hearing a natural sound or the selected radio station. It starts out quietly and takes a minute and a half to reach the volume level you selected. There are four sounds you can choose from: morning birds in the forest, cows from the alpes, a chuckoo sound and relaxing yoga music. The gradually increasing sound will make the wake up process even more pleasant, ensuring you're never rudely awakened.

Digital FM radio

The built-in digital FM radio lets you wake up to your favourite songs or news station every day. Just select your favourite radio station, and at your set wake-up time it will start to play, at first gently, gradually increasing over

ninety seconds to the volume level you selected.

Great sound quality

The speaker in this Wake-up Light is backed up by an integrated sound box, assuring a great sound quality when listening to the FM radio or when waking up with the natural wake-up sounds.

Dusk simulation

The gradual decreasing light and sound help you to drift to sleep. You can set your preferred time for the duration of the dusk simulation.

Specifications

Easy to use

- Anti-slip rubber feet
- Alarm test function
- Snooze button for sound: 9 minute(s)
- Compact size: Limited bedside table space required (14x19.5cm)
- Electricity back-up function: 5 minute(s)

Light

- Light on/off function
- Sunrise Simulating process (0-: 30 minute(s))
- Light intensity dimmer: 0-300 Lux at 40-50 cm
- Dusk simulation

Sound

- Digital FM radio
- Sound off function: Option to mute sound immediately
- Premium sound box: Integrated sound box
- Number of Wake-up Sounds: 4

Display

- Display brightness control: 4 settings
- Hidden LED display: Invisible display projected to

the product

Technical specifications

- Power: 26 W
- Voltage: 230 V
- Frequency: 50 Hz
- Cord length: 200 cm
- Type of lamps: Philips Energy Saving Lamp
- Insulation: Class II (double isolation)
- Lifetime of lamps: expected >6.000 hours

Safety

- UV-free: No UV radiation

Logistic data

- Country of origin: China
- CTV code: 884348001

Weight and dimensions

- Product dimensions: 14x19.5x23 (DxWxH) cm
- Product weight: 1.3 kg
